

## MUELLER FITTINGS COMPANY INC.

### DECLARATION OF CLEANLINESS FOR COPPER FITTINGS USED IN MEDICAL GAS SERVICE

Mueller Fittings Co., Inc. cleans its *Streamline* Wrought Solder Joint Fittings for medical gas service in conformance with the performance of CGA G4.1 Compressed Gas Association and meets the scope and intent of specification NFPA 99C.

Parts are cleaned in a hot detergent solution to assure adequate cleaning. A hot water rinse is used to help remove the cleaning solution and aid in the drying process. Parts are dried with the aid of a blow drier, which is free of oils. After inspection parts are sealed in a clear plastic bag and placed in a cardboard box awaiting shipment.

It must be recognized that in spite of the care and precautions exercised in the cleaning, inspecting and packing of these fittings, Mueller has no control of their handling, storage and installation once they have left our facilities.
